Subject: Web application Development using Asp.Net - Practical

Sr. No	Tonica	Div-A	Div-B	Div-C	Div-D
NO	Topics				
1	Create a first ASP.NET Website and execute it on web browser.				
2	Write ASP.NET program that will display "Hello World" on page load event.				
3	Write ASP.NET program that will display "Hello World" in Label control on form load event.	17/11/202	19/11/202	15/11/202	18/11/202
4	Write ASP.NET program that will display "Hello World" in <div> tag or tag on click of button.</div>	-		-	
5	Write ASP.NET program that will do following operations:				
6	- Take two string values from textbox control, contacted it & display it.	24/11/202	26/11/202	22/11/202	25/11/202
7	Write ASP.NET program that will take two int values &calculate a^b.	24/11/202	26/11/202 1	22/11/202	25/11/202
8	Write ASP.NET program that will take 3 subject marks & find Total & Average.				
9	Create ASP.NET Webpage that will take feedback details from user and Display it as testimonial. Feedback: Name, email and feedback desc	01/12/202	03/12/202	29/11/202	02/12/202
10	Create ASP.NET Webpage that will upload any file to webserver.				
11	Create ASP.NET webpage that will display Sleeve Items in a listbox control. On the selection of display image and cost of item.				
12	In above ASP.NET Webpage allow user to add quantity in textbox control (i.e Read only) on click of + & - button controls quantity should be increment & decrement then calculate payment.	08/12/202	10/12/202	06/12/202	09/12/202
13	Write an asp.net webpage that will make student exam details from exam form and generate fee receipt. Exam details: name, exam type year, sem subject's fees.	15/12/202	17/12/202	13/12/202	16/12/202
14	Create ASP.NET Webpage that will test Database connection.	13/12/202	1 // 12/202	13/12/202	10/12/202
15	Create ASP.NET webpage that will display data in Gridview Control using SqlDataSource.				
16	Create ASP.NET webpage that will display data in Gridview Control using C# code.	00/10/10	0.4/2.0/2.2	00/12/17	00/10/2
17	Create ASP.NET Webpage that will display data in to Repeater control.	22/12/202	24/12/202	20/12/202	23/12/202
18	Create ASP.NET Webpage that will display data in to Listbox and dropdownlist control using SqlDataSource.				
19	Create ASP.NET Webpage that will display data in to Listbox and dropdownlist control	4			
	Pag	e 1			

		ı	T	T	I
20	on button click event using c# cod. Create ASP.NET webpage that will take User's				
	Name & Favorite Color from TextBox &				
	Dropdownlist .before submitting values check whether values are empty or not using	29/12/202	31/12/202	27/12/202	30/12/202
	Required Field Validator.	1	1	1	1
21	Create ASP.NET Webpage that will take valid				
	date from user into textbox control using				
	Range validator.				
22	i) Check the Data Type Of Bdate				
	ii) Check Bdate must be greater than				
	now/today.				
	iii) Check End Date Must be Greater than Start				
23	Date. Create ASP.NET Webpage that will take valid	05/01/202	07/01/202	03/01/202	06/01/202
23	email address and valid URL using Regular				
	Expression Validation Control.				
24	Create ASP.NET Webpage that will not allow				
	user to enter more than 10 characters.				
25	Use custom validator.				
26	Create ASP.NET Webpage that registration	10/01/55	0.4/0.4/5.5	10/01/55	10/01/55
20	details like Username, Password, and Confirm	12/01/202	04/01/202	10/01/202	13/01/202
	Password from user, assign validation	2	2	2	2
	controls on all the fields and display				
	validation error message into validation				
	summary control.				
27	Create an ASP.NET Webpage that will take				
	username and password from user and create				
	session a session for username and display it				
28	on webpage. Create an ASP.NET webpage that will allow				
20	user to add product details to product master				
	table and upload product image to server.				
29	Create ASP.NET web page that will display	1	11/02/202		02/02/202
	products from product master table.		11/02/202		03/02/202
30	Create a webpage that will show full details of				
	the product on click.	02/02/202		31/01/202	
31	Create ASP.NET webpage that will display all	2		2	
	the records into gridview control. Create				
	Employee Table EmpID, EmpName, Bdate,				
32	and Contact. In above ASP.NET webpage add web controls	-			
34	that will insert data into gridview control.				
33	In above ASP.NET webpage add edit button				
	into gridview control that will edit/update				
	data of gridview control.				
34	In above ASP.NET webpage add delete button				
	into gridview control that will delete data of				
25	gridview control.	09/02/202	18/02/202	07/02/202	10/02/202
35	Create ASP.NET webpage that will display	2	2	2	2
	current date & time and create output cache of webpage and create cache by param.				
	or wenhage and create cache by harani.				

36	Create ASP.NET webpage that will display current date & time from user control and				
	create partial cache of webpage.			Γ	, ,
37	Create ASP.NET webpages that will display				
	current date & time using absolute expiration				
	cache.	16/02/202	25/02/202	14/02/202	17/02/202
38	Create ASP.NET webpages that will display	16/02/202	25/02/202	14/02/202	17/02/202
	current date & time using absolute expiration	2	2	2	2
	cache.				
39	Create ASP.NET webpage that will display				
	data into grid view control and create data				
	caching.				

Subject: Web Application Development using Asp.net - Theory

Sr. No.	Topic	Div: A	Div: B	Div: C	Div: D
110.	Chapter1: Overview of ASP.NET				17-11-2021
1	Framework: Introduction Overview of Asp.NET Framework	15-11-2021	15-11-2021	15-11-2021	
2	Client Server Architecture	15-11-2021	15-11-2021	15-11-2021	17-11-2021
2	Application Web Servers	18-11-2021	18-11-2021	16-11-2021	18-11-2021
3	Installation of IIS server			16-11-2021	18-11-2021
4	Types of controls in ASP.NET	20-11-2021	20-11-2021	17-11-2021	20-11-2021
5	Page Architecture, Page class	22-11-2021	22-11-2021	22-11-2021	24-11-2021
6	Introduction to standard Controls : Buttons, Textbox, Checkbox,	25-11-2021	25-11-2021	23-11-2021	25-11-2021
7	Label, Panel, Listbox, Dropdownlist, File Upload Control	27-11-2021	27-11-2021	24-11-2021	27-11-2021
8	Creatng Asp.Net Application& Adding Controls to a Webpage	27-11-2021 29-11-2021	27-11-2021 29-11-2021	24-11-2021 29-11-2021	27-11-2021
	Running an ASP.Net Application				01-01-2021
9	Chapter 2: ASP.NET Validation Controls Introduction to Validation	29-11-2021	29-11-2021	29-11-2021	01-01-2021
10	Client Side Validation	29-11-2021	29-11-2021	29-11-2021	01-12-2021
10	Server Side Validation	30-11-2021	02-12-2021	30-11-2021	02-12-2021
11	Types of Control : RequieredField Validator	02-12-2021	02-12-2021	01-12-2021	04-12-2021
12	Range Validator, CompareField Validator	02-12-2021	02-12-2021	01-12-2021	04-12-2021

13	Pagular Evaraccion Validator	04-12-2021	04-12-2021	06-12-2021	08-12-2021
13	RegularExpression Validator Custom Validator				
14		04-12-2021	04-12-2021	06-12-2021	08-12-2021
	ValidationSummery Control	06-12-2021	06-12-2021	07-12-2021	09-12-2021
15	Chapter 3: State Management: Introduction to State	06-12-2021	06-12-2021	07-12-2021	09-12-2021
16	Requirement of State in Asp.Net	18-12-2021	18-12-2021	08-12-2021	15-12-2021
17	Client Side State Management	20-12-2021	20-12-2021	08-12-2021	15-12-2021
18	Server Side State Management	20-12-2021	20-12-2021	13-12-2021	15-12-2021
	Various State Management Techniques :	23-12-2021	23-12-2021	14-12-2021	16-12-2021
19	View State	23-12-2021	23-12-2021	14-12-2021	10-12-2021
20	Query String, Cookie	27-12-2021	27-12-2021	14-12-2021	16-12-2021
21	Session State	30-12-2021	30-12-2021	15-12-2021	18-12-2021
22	Application State	30-12-2021	30-12-2021	20-12-2021	22-12-2021
	Chapter 4: ADO.NET:	01-01-2022	01-01-2022	21-12-2021	23-12-2021
23	Architecture of ADO.NET				
24	Connected Architecture &	03-01-2022	03-01-2022	21-12-2021	23-12-2021
	DisConnectedArchitecture,
